Skills & Interests

Technical Skills:

- **Game Design:** Well Versed in Game Design **Pipelines, Concepts** and Unique **Gameplay Looping**.
- **Level Design:** Proficient with core **principles of level design** and Well Acquainted with **video games**.
- **Technical Art:** Good Knowledge of **Post-Process Shaders** and basic **HLSL** Learning for Shader Creation.
- **3D Art:** Familiarity with **3D art** in game development Pipeline.
- **Front-End Web Development:** Well versed in **Web Design** and **Development**.

Softwares:

- **Game Engines & Softwares:** Unity, Unreal Engine 5, Godot, Maya, 3D Substance Painter, Blender Github, Adobe Photoshop, Aseprite
- **Languages:** C#, Tailwind Css, GD script, HLSL

Interests: Level Design, Game Design, Technical Art and Front-end Web Development

Projects

Parcel Prasad (GameJam Project) : [Itch.io Game Build](#)

- **Level Design:** Quick Level Design for Gameplay looping and **faster traversal** of the Player.
- **Map Artifacts:** Blueprint scripting for **Multiple Map artifacts** and Resource Management.

12 TILES (Unity Game Prototype) : [Game Prototype Showcase](#)

- **Procedural Level Generation:** Game uses an unique script which **generates the level elements randomly**.
- **Anchor System:** Unique **Anchor System** Design which controls the gameplay loop.
- **Game Design:** **Paper Prototyping** to Game Generation and all Scripting.

Fast'N'Food (Game Prototype) : [Fast'N'Food Showcase](#)

- **Technical Art:** Constructed and refined 7 post-process shaders using **HLSL** and Blueprints within **Unreal Engine 5**.
- **Texture Art:** Textured Stylized Assets for **Game Props** and **Food Items**.

Post-Process Shaders (Lighting Experiments) : [Shaders Showcase](#)

- **Shader Generation:** Created 12+ Post Process Shaders with modular nodes which come under different **stylized** art styles such as: Toon Shader, Outline Shader, Posterized Shader, Pixelated Shaders through **Unreal**.
- **Unique Lighting Methods:** Creation Material Functions and HLSL Codes which helps the Shader Volumes Function much better.

Malorian 3516 (3D Model) : [Malorian 3516](#)

- **3D Modeling:** Developed a Model 3D asset from **Cyberpunk 2077**. A Combat Revolver owned by Johnny Silverhand. All parts and textures are developed from Scratch through **Maya** and **3D Substance Painter**.
- **Texturing:** Texture Painting for adding depth and boldness in the project.

Competitions

Technex GameJam by IIT Banaras Hindu University

Feb 2026- Mar 2026

- Secured 3rd Position in Technex GameJam hosted by IIT Banaras Hindu University (BHU) for the Game Chunk The Robot a 2D Side Scroller.

Better Grounds Program by tGELF and Krafton - 2nd Position

Jun 2025 - Aug 2025

- Secured 2nd Position in Better Grounds Program hosted by *The Global Education & Leadership Foundation* (tGELF) Partnered with Krafton. Position secured with **Fast'N'Food** a Food Service Game.

Education

Lovely Professional University(Present)(
B.Design(Gaming)

Jalandhar, Punjab
2023-2027

Certificates

- **Unreal Engine 5** Blueprints – Druid Mechanics
- Complete C# Development (**Unity 3D**)
- Hard Surface Modeling in **Maya**
